Experience

QuickPrism — Feb 2024 - May 2024
Software Developer Internship — New Delhi

- Developed a **Cross-Platform Application** to be used by businesses and their employees.
- Developed modules for **B2B dealings**(requisition, quotation, and many others) and **inventory management** to improve productivity.
- Used **GPT-4 APIs** to create an **AI Bills Scanning System** to help reduce paperwork.
- Designed multiple **SQL db tables** as per the requirements.

TFN Enterprises — March 2023 - Feb 2024
Frontend Developer (Android) — Remote

- Developed the payment module of an **E-commerce application** and integrated the **RazorPay Payment SDK,** simplifying payments for the app.
- Developed a **School Management application** from **Scratch** improving productivity and efficiency, reducing paperwork, and **improving workflows** for day-to-day tasks.
- used **Flutter-Bloc for state management**, **Getx** for Storage and other utilities, and **Firebase** for authentication.
- Implemented **Firebase Analytics and Crashlytics** to generate **useful user insights and crash reports.**
- received **positive feedback** for dedication and simplifying complex workflows for the product.

Education

Inderprastha Engineering College — Aug 2020 - July 2024 (Expected)
Information Technology — B.Tech
7.7 CGPA

Saraswati Vidya Mandir — Apr 2020
Science Stream — Class 12 (CBSE)
93.6 %

Bloom Public School — 2018
84.2 % — Class 10

Projects

Real-Time Chat Application
https://github.com/anujsinghrawat/Live-Chat-App

- **Real-Time Chat Application** Made with the help of **Jetpack compose** and **Firebase** for authentication and storage.
- implemented the **Stories Feature** in which stories are visible for only 24hrs.
- used the **dagger-hilt, MVVM** model for efficiency and better scalability.

Kotlin, Jetpack Compose, Firebase

User Management System
https://github.com/anujsinghrawat/crud_app

- **CRUD app** was made with the help of **Nodejs** with **MongoDB** for the database and the **backend Server** was created with the help of **ExpressJs**.
- Successfully developed **multiple REST APIs** to perform all the **CRUD** operations and fetch data from the **No-SQL database.**

NodeJS, Express, MongoDB Atlas

Skills

Backend Devlopment	Flutter	Android Development
● ● ● ● ●	● ● ● ● ●	● ● ● ● ●
